PROFILE

Hybrid Salesforce & Infrastructure developer — 3 years of Salesforce development, backed by systems and network training and practice since 2022, with particular attention to environments where the CRM and the infrastructure hosting it must be designed together: projects delivered in luxury and insurance; target sectors: industry, energy, logistics, automotive. Apex, Flows, LWC on the platform side; Windows Server, AD DS, PfSense, security and CI/CD on the infra side. RNCP Level 6 — Développeur Concepteur Logiciel, Salesforce specialization (OpenClassrooms, Oct 2025) and RNCP Level 5 — Systems & Networks. Concrete proof: on Legarant-AXG (insurance), I delivered the Apex REST endpoint and the Heroku application that consumes it — one person making both decisions at once, not two juxtaposed skill sets.
