## PROFILE

Hybrid Salesforce & Infrastructure engineer — **almost 4 years of combined practice** (Salesforce development and systems/network administration), with particular attention to environments where the CRM and the infrastructure hosting it must be designed together: **industry, energy, logistics, automotive, healthcare, luxury**. Apex, Flows, LWC on the platform side; Windows Server, AD DS, PfSense, security and CI/CD on the infra side. RNCP Level 6 — Développeur Concepteur Logiciel, Salesforce specialization (OpenClassrooms, Oct 2025) and RNCP Level 5 — Systems & Networks. Concrete proof: on Légarant-AXG (insurance), I delivered the Apex REST endpoint AND the Heroku application that consumes it — one person making both decisions at once, not two juxtaposed skill sets.
